What is the Asian Paints Causeway Safe Painting Service?

The Safe Painting Service by Asian Paints causeway is a complete end-to-end safe and hygienic home painting service where our experts provide consultation about our products and services. They will help you in the execution of your site which is done by our painters and contractors who are trained to provide only the best finish.

How will Asian Paints Causeway Safe Painting Service go about painting my home?

Our Asian Paints causeway associate will visit & inspect your house. He will suggest the products you can use, and provide a rough estimate based on the products and the surface to be painted. After you have agreed upon an estimate, our trained applicators shall take care of the entire painting process. All the processes shall be carried out while following stringent Safety Protocols to ensure a safe environment.

Who will paint my house?

We have a panel of contractors and painters who are trained by us with respect to our product range. Our painters are trained to ensure that the correct application procedures are followed. They are also trained in textured and specialty paint finishes.

After the painting is over, would the Asian Paints Causeway Safe Painting team clean up my home?

Yes, we will do the post painting clean-up for your home and will leave your home clean and beautifully painted.

Will the Asian Paints Causeway Safe Painting team assist me in shifting of furniture and covering, before the painting starts?

The team will cover the floor, furniture, doors, windows, etc. with masking sheets before they start painting, to prevent any damage during the painting process. Our team will also help you shift the furniture.

Disclaimer: The Asian Paints causeway Safe Painting Service is subject to the contract between the customer and dealer. Asian Paints causeway is not involved in any transaction, and only supplies paints and provides training.
